COSTIN SÂRGHIUȚĂ

Creative Media & Game Technologies · Saxion University · Enschede

I'm a creative media student with a strong interest in how real people interact with digital products, especially those who are often overlooked in the design process. I enjoy talking to users, finding the gap between what a product does and what people actually need, and turning that into something concrete. I have hands-on experience with user research, interactive prototyping and design thinking, and I'm drawn to work where the output genuinely affects people's daily lives.

Player 1

Experience

Game Designer
Sep 2026 – Feb 2027

Thales · Internship, 6 months

Retail Assistant & Delivery Driver
2022 – Present

Primark & Delivery (Netherlands)

- Worked alongside people from many different backgrounds daily, building natural communication skills across language and cultural barriers.

Projects

XR Lab Enschede: Client Project
2024 · 8 weeks

Real-client project · Saxion University · Scrum Master

- Managed the full project cycle for a real client, from initial brief and stakeholder communication through to final presentation.
- Led sprint planning and retrospectives as Scrum Master, keeping the team aligned and the work moving.

Motorised Ping Pong Cannon
2024 · Saxion University

Hardware project · Arduino · Interactive installation

- Built a phone-controlled ball cannon using two Arduino boards, combining hardware sensors, motorised components and wireless communication.
- Designed and implemented the full interaction flow, from mobile control input to physical output.

Relevant coursework

UI/UX Design Course
2023/2024 · Saxion University

Weekly sprints · A/B testing · Interactive prototyping · User feedback

- Ran weekly A/B tests with real users, collecting feedback on interface variations and iterating designs based on results.
- Built interactive prototypes in Figma every sprint cycle, testing usability assumptions before moving to higher fidelity.
- Learned to identify what users say versus what they actually do, and how to design around that gap.

Design Thinking Course
2023/2024 · Saxion University

Problem discovery · Field surveys · Hi-fi prototype delivery

- Identified a real-world problem by going outside the university environment and gathering surveys from diverse user groups with different backgrounds and needs.
- Centralised and analysed responses to find patterns, then used those insights to define the design direction.
- Delivered a fully working hi-fi prototype/app that addressed the problem, validated against the original research findings.

Education

Saxion University of Applied Sciences
2022 – Present

Creative Media & Game Technologies · Enschede, Netherlands

- **Relevant courses:** UI/UX Design, Design Thinking, Interactivity & Programming, Web Development.
- Worked on 8+ team projects applying Agile/Scrum, including briefing, prototyping, testing and presenting to stakeholders.
- Served as Scrum Master in 3 projects, coordinating sprints, retrospectives and team communication in Jira.
